DETAILED ACTION

Claim Rejections Under 35 USC § 102

The rejections of claims 1-54 under 35 U.S.C. 102 by Sternson et al (Organic Letters), Kuruvilla et al. (Nature) and Sternson (J. Am. Chem. Soc.), have been overcome by Applicant's amendment filed March 16, 2006.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-54 are rejected under 35 U.S.C. 102(b) as being anticipated by Schreiber et al. (WO 98/16830).

Applicant teaches dioxane compounds having a general formula I:

wherein all the variables are as defined in the claim.

Schreiber discloses dioxanes, which share the same formulaic compounds. (See formula 1, Abstract). The compounds in the said reference has the same structure, which includes Y as an aromatic, R¹ as a H, aliphatic, alicyclic heteroaliphatic, heterocyclic, aromatic or heteraromatic moiety, and R³ as an aromatic, X as S, and n as

1-5, and falls within the range of Applicant's compounds. (See pages 61-62, Figure 19/45)). Since Schreiber teaches the exact compounds, Applicant's claims are anticipated, and thus, rejected under 35 U.S.C. 102(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schreiber et al. (WO 98/16830).

Schreiber teaches a generic group of dioxane derivatives, which embraces Applicants' claimed compounds. (See pages 61-62, Figure 19/45 and definitions for R¹, R², and R³). The claims differ from the reference by reciting specific species and a more limited genus than the reference. However, it would have been obvious to one having ordinary skill in the art at the time of the invention to select any of the species of the genus taught by the reference, including those instantly claimed, because the skilled chemist would have the reasonable expectation that any of the species of the genus would have similar properties, and thus, the same use as taught for the genus as a whole. One of ordinary skill in the art would have been motivated to select the claimed compounds from the genus in the reference since such compounds would have been suggested by the reference as a whole. A prior art disclosed genus of useful

Art Unit: 1624

compounds is sufficient to render prima facie obvious a species falling within a genus.

Thus, Applicant's claims are obvious, and therefore, rejected under 35 U.S.C. 103.

Conclusion

Claims 1-54 are pending. Claims 1-54 are rejected. No claims are allowed.
